4.2A–D · PP. 213–227 · ARC A: 213–219; ARC B: 220–227

Digital systems change how organizations work

> Name one decision a business can make using transaction records.

AI conceptual illustration · fictional scene, not case evidence

Operation and organization of a business

TRANSACTION SYSTEM

Sale → recorded activity

A record of an exchange

SHARED CALENDAR

Availability → coordinated staffing

A parallel coordination tool

ANALYTICS

Totals + context → next order

Information supports a decision

Fictional school event shop. These are three connected uses, not a mandatory sequence or automatic hierarchy change.

Shared calendars and files can coordinate a team

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 213–214.

APPLY · 3 · TEXTBOOK PP. 213–214

Customer value and business incentives

1. Customer pays →

2. Business supplies a product/service →

3. Revenue meets costs or objectives

Trace an actual exchange. Advertising, commission and subscription have different payment relationships.

An organization may trade immediate profit for repeat use

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 213–214.

APPLY · 4 · TEXTBOOK PP. 213–214

Transaction data becomes a decision

Item	Recorded sales	Question before ordering
Badge	12	Was stock available throughout?
Poster	4	Did price or stock limit purchases?

An invented event shop records 12 badge sales and 4 poster sales

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 213–214.

Diversification and workforce diversity

BUSINESS DIVERSIFICATION

Change products, markets or the supply chain

WORKFORCE DIVERSITY / INCLUSION

Who is present—and who can participate effectively?

Do not confuse what a business offers with who can work and participate in it.

Diversification changes products, markets or the supply chain

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 214–215.

Horizontal and vertical diversification

Strategy	Invented action	Relationship
Horizontal	Video service adds messaging	Complementary service
Vertical	Online shop runs delivery fleet	Another part of its chain

Horizontal: add a complementary product or service

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 214.

Concentric and conglomerate diversification

Strategy	Invented action	Relationship
Concentric	Existing service adapted for business users	Wider audience
Conglomerate	Game firm enters agriculture	Unrelated activity

Concentric: adapt an existing line for a wider audience

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 214–215.

Hiring systems affect opportunity

01

Historical labels become screening input

→

02

Criterion filters applications

→

03

Some applicants advance; others need a challenge route

Validity, access and unequal outcomes need evidence. Speed is a separate measure.

A system can screen applicants quickly

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 215–217.

APPLY · 9 · TEXTBOOK PP. 216–217

A historical case needs a current check

HISTORICAL ACCOUNT · 2022

The textbook describes a vendor’s earlier practice.

CURRENT CLAIM

Today’s product requires dated current primary documentation.

Retain the enduring dilemma without turning an old description into a current specification.

Textbook examples establish the chapter’s original discussion

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 216–217.

APPLY · 10 · TEXTBOOK PP. 217

Working practices and office design

SHARED SPACE

Coordinate an event plan together

QUIET / PRIVATE SPACE

Focus on editing or hold a confidential discussion

Judge the arrangement against the task, access and work–home boundaries.

Digital tasks can change where and how work happens

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 217.

Remote work and digital nomadism

AI conceptual illustration · not case evidence

Remote work uses networks to complete work away from a central workplace

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 217–218.

Crowdsourcing and crowdfunding

CROWDSOURCING

Volunteer translations → work / information

CROWDFUNDING

Donations for an exhibition → money

Identify what is contributed. Participation does not guarantee quality or success.

Crowdsourcing gathers contributions, information or work

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 218–219.

Microwork, gig work and sharing

Microwork: small paid task	Gig: paid job or service	Sharing: access to a resource

These describe different arrangements; investigate who contributes, who pays and who sets the conditions.

Microwork consists of small tasks completed for payment

Platforms can mediate access to work

1. Customer requests work →

2. Platform matches/allocates →

3. Worker performs task →

4. Payment subject to rules

Allocation and eligibility can shape opportunity. Check actual terms and worker evidence before judging the result.

A platform can match a worker and a customer

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 217–219.

Employee organizations and bargaining power

INDIVIDUAL TASK ALLOCATION

Platform sets conditions; inspect the actual arrangement.

COLLECTIVE NEGOTIATION

Workers organize and negotiate as a group.

Status and rights require jurisdiction-specific evidence. No legal status is assumed here.

Workers can organize to seek better conditions

Real source Y: revenue share and creator income

YOUTUBE STATED BASES · ILLUSTRATIVE AMOUNTS, NOT EARNINGS

55%

Watch Page

Net advertising revenue

45%

Shorts

Allocated Creator Pool share

55% × $300 = $165; 45% × $600 = $270. Different fictional bases: this is not a comparison of actual income.

Actual income also depends on eligibility, allocation and costs. Read the current linked terms.

YouTube describes different payment bases for Watch Page and Shorts

YouTube Partner earnings overview, checked 5 October 2026. Read primary source Textbook connection: pp. 213–219.

Real source L: opportunities and working conditions

2021

ILO · historical labour research

Source paraphrase · read the cited original

The ILO examines different forms of platform work

SUPPORTS THIS CLAIM

A frame for working conditions, access to work and social protection.

DOES NOT ESTABLISH

A current individual TikTok creator’s earnings.

ILO, 23 February 2021, historical research summary. Read primary source Textbook connection: pp. 217–219.

An impact becomes an implication through a reasoned link

01

Rule increases exposure for a new creator

→

02

Possible impact: more opportunities to be seen

→

03

Possible implication: sustainable wider participation

The longer-term claim needs continued exposure and suitable income opportunities.

Mechanism: a rule changes visibility

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 213–219.

Pause: explain the first business arc

PAUSE · INDIVIDUAL FIRST ATTEMPT · 2 MINUTES

Which evidence would help evaluate a creator income claim?

Predict / retrieve | Justify with an operation | Check → correct

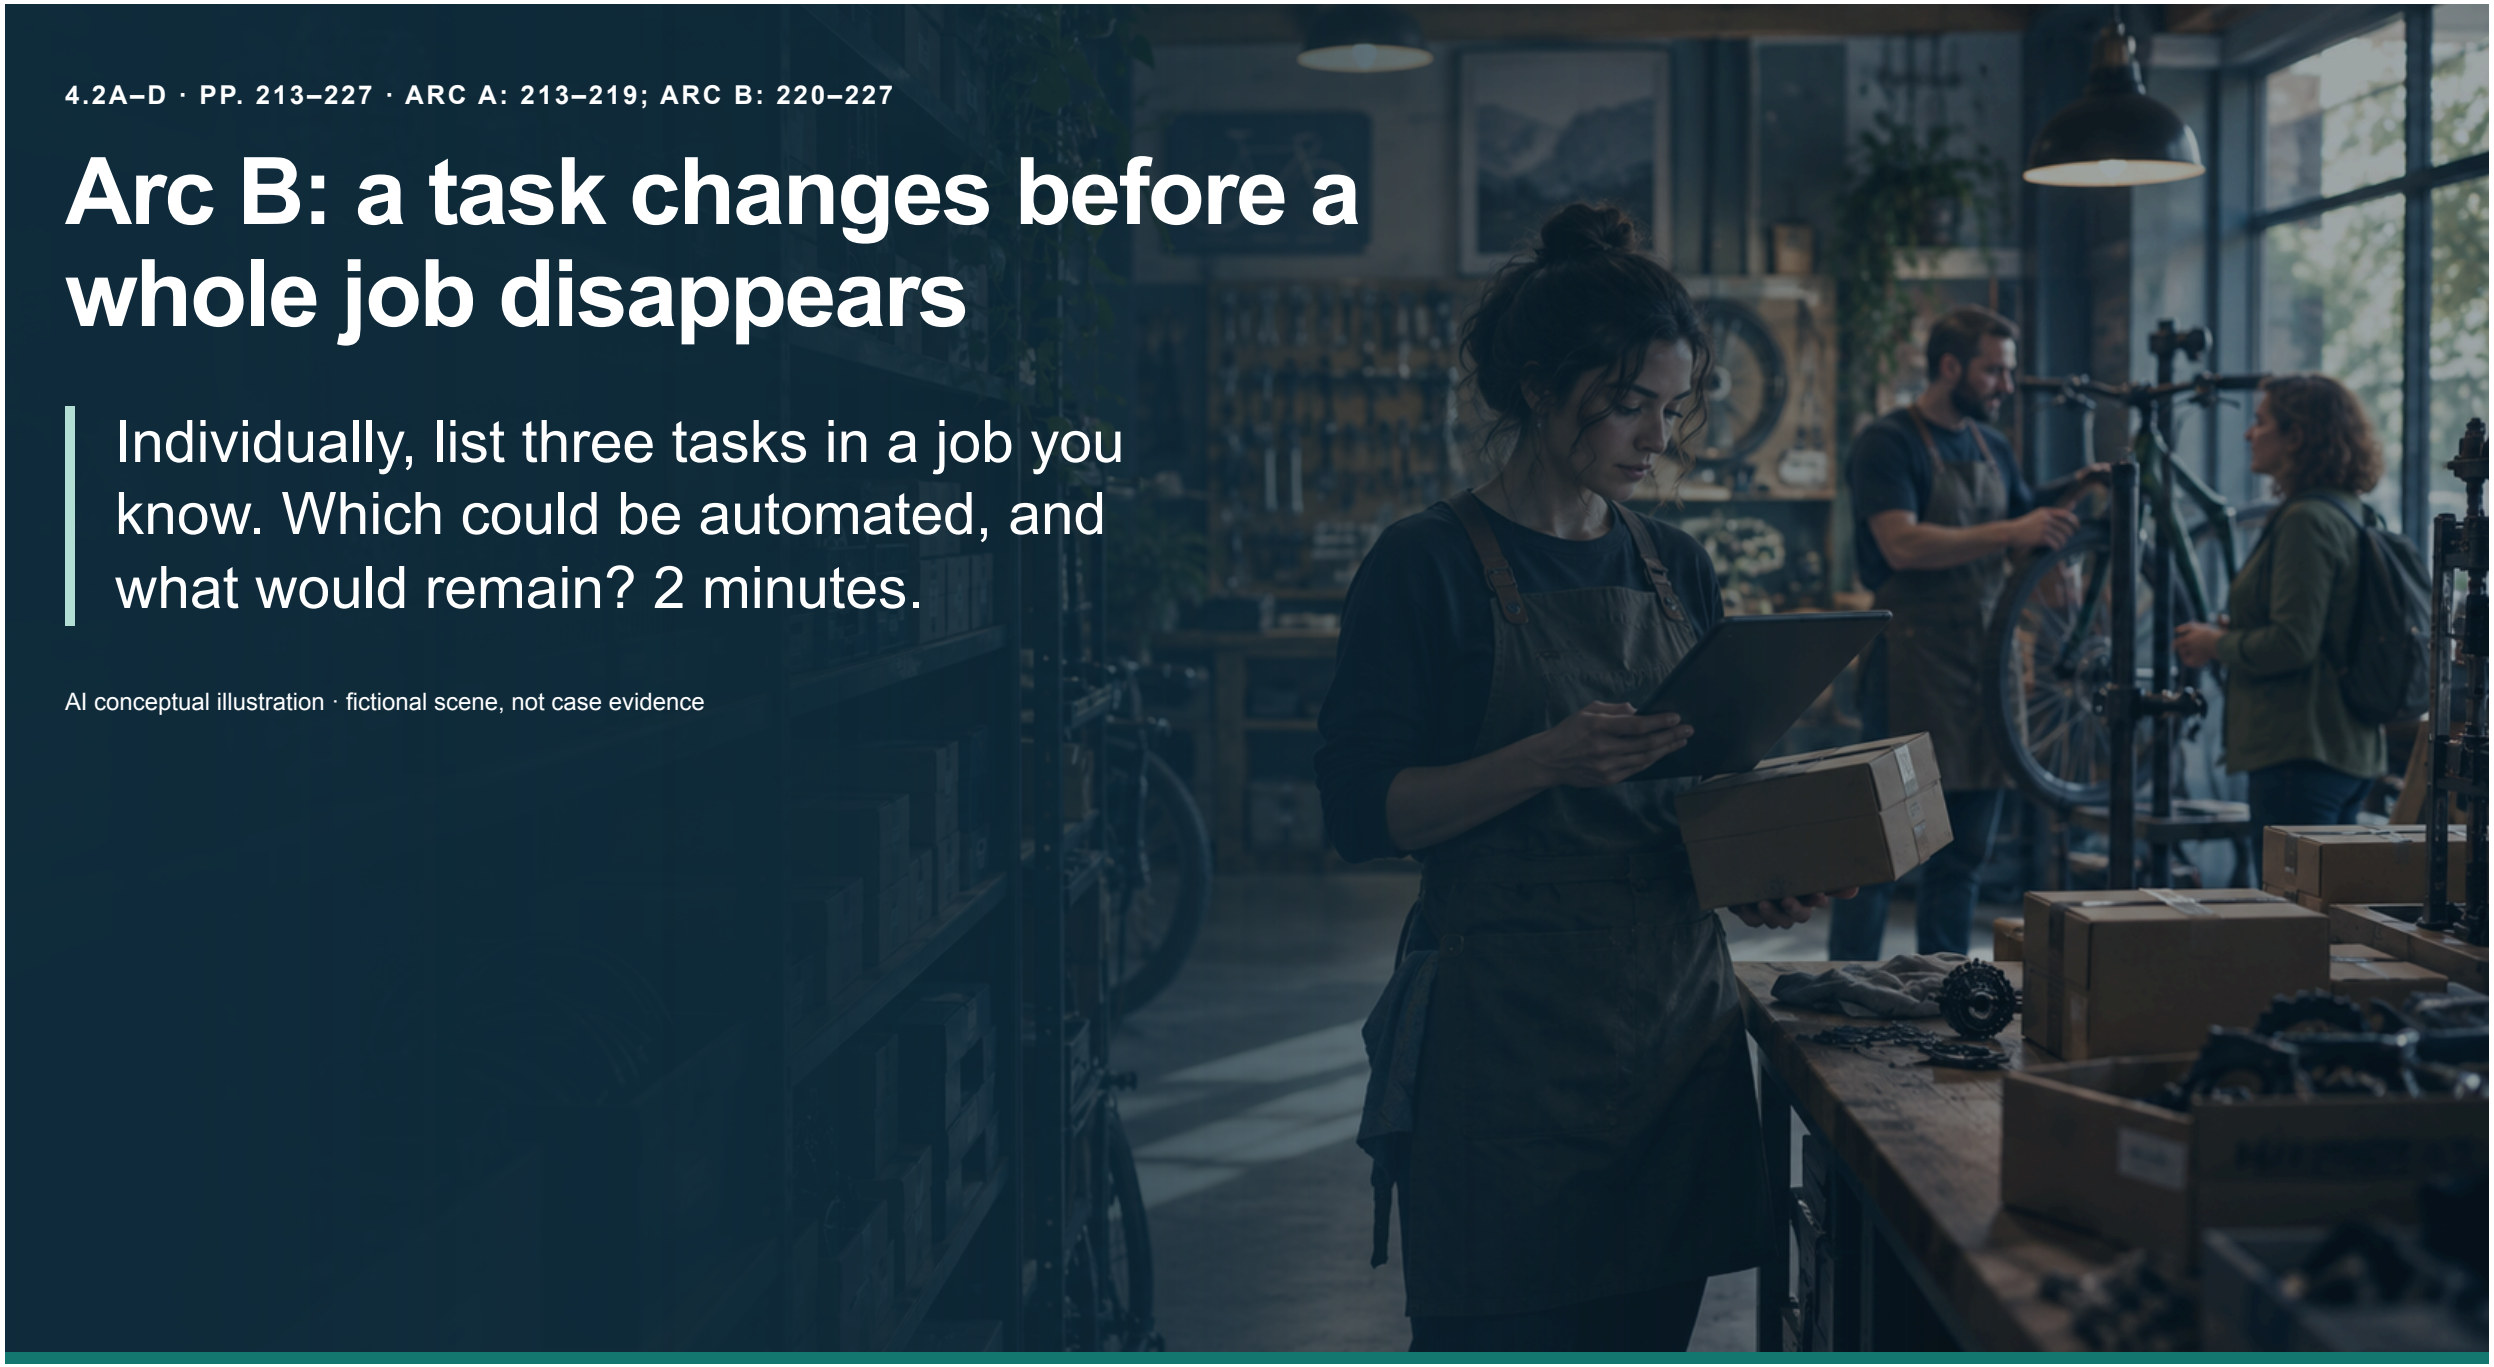

Save your first response below. Explain the correction on a fresh example; practice is not a mark.

Explain a transaction-to-decision mechanism

Bomfim et al., Digital Society for the IB Diploma, Hodder, 2022. Printed pages cited per slide. Original paraphrase. Textbook connection: pp. 213–227.

Arc B: a task changes before a whole job disappears

> Individually, list three tasks in a job you know. Which could be automated, and what would remain? 2 minutes.

AI conceptual illustration · fictional scene, not case evidence

Monitoring can become a feedback loop

1. Task time recorded →
2. Target comparison →
3. Prompt or consequence →
4. Next time recorded

Feedback: the next recorded time returns to the comparison. Synthetic model; speed does not measure safety.

Record a task time

Hodder 2022, printed pp. 220–221. Original teaching paraphrase; synthetic examples unless a source is named.

E-commerce names the exchange, not the payment method

Transaction	Parties	Category
Parts wholesaler → repair shop	Business → business	B2B
Repair shop → customer	Business → consumer	B2C
Used bicycle owner → another person	Consumer → consumer	C2C

B2B: business sells to business

Hodder 2022, printed pp. 221–222. Original teaching paraphrase; synthetic examples unless a source is named.

Check: automate, trade, or pay?

PAUSE · INDIVIDUAL FIRST ATTEMPT · 2 MINUTES

A business marketplace connects two individuals trading a used desk. Which describes the desk sale?

Predict / retrieve | Justify with an operation | Check → correct

Save your first response below. Explain the correction on a fresh example; practice is not a mark.

Use the parties and task to justify the term

Hodder 2022, printed pp. 220–222. Original teaching paraphrase; synthetic examples unless a source is named.

APPLY · 24 · TEXTBOOK PP. 222

Targeted marketing connects a signal to an audience

1. Page visit observed →

2. Cycling interest inferred →

3. Audience selected →

4. Advert shown

A later click is a possible feedback signal, not proof of intention or causal persuasion.

Recorded signal → inferred interest

Hodder 2022, printed pp. 222. Original teaching paraphrase; synthetic examples unless a source is named.

Currency and payment are different layers

1. Price: CAD 20 →

2. Settlement: card network →

3. Balance changes →

4. Receipt of payment

Illustrative transaction. Currency is the unit; the payment system is the settlement route.

Currency expresses value, such as Canadian dollars

Hodder 2022, printed pp. 223. Original teaching paraphrase; synthetic examples unless a source is named. Current-context source checked 11 October 2026: Read primary source

A token record does not automatically transfer copyright

Ledger identifier	Associated digital file	Separate licence or rights

Token transfer and rights transfer require separate evidence. A link is not a copyright licence.

Token: a recorded identifier or claim under a system’s rules

Hodder 2022, printed pp. 223. Original teaching paraphrase; synthetic examples unless a source is named. Current-context source checked 11 October 2026: Read primary source

Check: identify what changed hands

PAUSE · INDIVIDUAL FIRST ATTEMPT · 2 MINUTES

A CAD-priced online lesson is paid by card. Which conclusion follows?

Predict / retrieve | Justify with an operation | Check → correct

Save your first response below. Explain the correction on a fresh example; practice is not a mark.

Name the currency or token

Hodder 2022, printed pp. 223. Original teaching paraphrase; synthetic examples unless a source is named.

APPLY · 28 · TEXTBOOK PP. 223

Cashless convenience can create an access barrier

Design choice	Potential gain	Question to test
App only	Quick payment for connected users	Who cannot access the app?
App + alternative	More routes during an outage	What staffing and costs are needed?

Fast settlement can help customers and sellers

Hodder 2022, printed pp. 223. Original teaching paraphrase; synthetic examples unless a source is named. Current-context source checked 11 October 2026: Read primary source

Small purchases can add up

1. $2 each →

2. 12 purchases →

3. 12 × $2 →

4. $24 total

Synthetic spending example. A small price does not set a cumulative limit.

Microtransaction: a small digital purchase

Hodder 2022, printed pp. 223–224. Original teaching paraphrase; synthetic examples unless a source is named.

From a digital model to a physical object

1. CAD geometry →

2. Slice into paths/layers →

3. Deposit material →

4. Inspect dimensions

Simplified filament process. A successful print does not establish suitability or safety.

AI conceptual illustration · not case evidence

CAD model → slicing instructions

Hodder 2022, printed pp. 224. Original teaching paraphrase; synthetic examples unless a source is named.

Check: a gain needs a comparison

PAUSE · INDIVIDUAL FIRST ATTEMPT · 2 MINUTES

A printer builds one part with few offcuts. What can you reasonably conclude?

Predict / retrieve | Justify with an operation | Check → correct

Save your first response below. Explain the correction on a fresh example; practice is not a mark.

State the mechanism that could produce a benefit

Hodder 2022, printed pp. 223–224. Original teaching paraphrase; synthetic examples unless a source is named.

Globalization connects customers, suppliers and workers

1. Supplier abroad → input →

2. Local business → production →

3. Customer abroad → sale

Global sourcing and borderless selling are different directions in the business relationship.

Borderless selling reaches customers in another country

Hodder 2022, printed pp. 225–226. Original teaching paraphrase; synthetic examples unless a source is named.

Location and organizational boundary are separate questions

Support arrangement	Location change	External provider?
Own overseas team	Offshore	No
Local contractor	Domestic	Yes: outsourced
Overseas contractor	Offshore	Yes: outsourced

Offshoring: move an operation to another country

A judgement compares whose costs and gains count

CUSTOMER

Access · price · reliability

Who is excluded?

WORKER

Tasks · conditions · influence

Who can challenge a decision?

ORGANIZATION

Costs · reach · resilience

What dependency is created?

A recommendation needs a criterion, evidence, a limitation and a condition that could change it.

Customer: access, price, reliability

Hodder 2022, printed pp. 225–227. Original teaching paraphrase; synthetic examples unless a source is named.

APPLY · 35 · TEXTBOOK PP. 226–227

Retrieve, submit, correct, revisit

PAUSE · INDIVIDUAL FIRST ATTEMPT · 2 MINUTES

A firm brings an overseas contractor’s task back to its own domestic staff. What changed?

Predict / retrieve | Justify with an operation | Check → correct

Save your first response below. Explain the correction on a fresh example; practice is not a mark.

Close notes: distinguish location from contracting

Hodder 2022, printed pp. 226–227. Original teaching paraphrase; synthetic examples unless a source is named.
