

British Library Source-Lens Dossier

F-P-DS-U01-001 | British Library Source-Lens Dossier

Name _____

Date _____

Define digital society, map the case mechanism, evaluate sources, apply the strongest concepts and write one Paper 1-style PEEL + Evaluate paragraph. This teacher-created practice is not an official IB examination question.

Assignment duration: three 70-minute classes. Two-class option: combine the final test, revision and submission audit with Class B.

Teacher-created Paper 1-style practice

Evaluate the extent to which the British Library cyberattack shows that power in digital society depends on control of infrastructure.

This is original classroom practice, not an official IB examination question.

Three-class sprint

Class A · Establish the case	Separate fact from inference, build the supported attack-and-recovery mechanism and complete the three-source matrix.
Class B · Analyse significance	Map two distinct stakeholders, apply the strongest 3C lenses and distinguish immediate impacts from conditional implications.
Class C · Evaluate and judge	Write and calibrate one Paper 1-style PEEL + Evaluate paragraph containing a counter-perspective, trade-off and qualified judgement.

Required evidence

1. Precise definition of digital society
2. Annotated attack-and-recovery system map
3. Source matrix using British Library, ICO and NCSC evidence
4. Impact-to-implication chain for two stakeholders
5. Paper 1-style PEEL + Evaluate paragraph with a conditional judgement

Foundation checkpoints

Day 1	One fact, one inference and one unanswered question are clearly separated; the system map contains technical and human components.
--------------	--

The catalogue goes dark	
Day 2 How the incident produced disruption	The system map distinguishes supported stages, inferred connections and unknown details; one safeguard is linked to a precise mechanism.
Day 3 Concepts change the question	The two selected concepts produce different insights, and each connection contains a mechanism, stakeholder and evidence reference.
Day 4 Impact becomes implication	Two stakeholders have distinct impact chains; at least one implication includes a timeframe and condition; the counter-perspective uses case evidence.
Day 5 Source-lens response studio	The paragraph answers the exact question, combines at least two sources, explains one mechanism, differentiates stakeholders and ends with a conditional judgement.

Written response plan

Point, evidence, mechanism, lens, counter-perspective, trade-off and conditional judgement:

Submission audit

- ☐ Precise definition of digital society
- ☐ Annotated attack-and-recovery system map
- ☐ Source matrix using British Library, ICO and NCSC evidence
- ☐ Impact-to-implication chain for two stakeholders
- ☐ Paper 1-style PEEL + Evaluate paragraph with a conditional judgement

Teacher confirms achievement. Retain the editable/process evidence with the final product.
